

## *XH A1 Presets and Filter Image Catalog*

The following stills were taken from screen captures in Final Cut Pro in order to serve as a visual reference for novices like me, and probably others, to get an idea of “what preset does what” and “what happens when I add a filter” when using a Canon XH camera.

Although it's not a professional piece, my intent was to make a printed field reference for personal use. I thought that I'd share with the DV community should someone else also need one.

It is by no means complete.

I tested only the Panalook, Naturalo, EOS, and Olegwarm presets and then shot with no preset selected to establish a baseline.

The filters used were: Hoya UV (O), Tiffen 81A, Vivitar 81B, Tiffen FL-D, Tiffen Warm Soft FX 3, Tiffen Black Warm Black Pro-Mist 1, and the Tiffen Warm Black Pro-Mist 2. As with the Presets, there is a “no filter” baseline photo.

As I stated above, the images were screen captures from FCP. They were then batch processed to crop unwanted areas. No doubt, there was some quality degradation in the process. This layout was created in Adobe InDesign and then exported to Adobe Acrobat to preserve what quality I could.

Should you have any questions, I can be reached at [bipolardave@hotmail.com](mailto:bipolardave@hotmail.com). Please reference this PDF in you subject so that any emails won't be mistakenly deleted.

Thanks for downloading.

Cheers,  
Dave

## Indoors Series 1

This series of captures was taken indoors at night. I used a generic 500 watt halogen studio lamp and soft box. The lamp was placed to the right of the image.

The wall in the background is "marblized" with 6 shades of cream and tan paint. A corner runs nearly down the center of the image, behind the far plant stand. The flowers are natural.

Camera settings: Framerate = 24F, resolution at 1080. Fstop@ 2.0, shutter speed = 1/48, and gain is noted in the photos save for the Olegwarm series, where it was set at 6dB.

## No Preset

Preset: Panalook

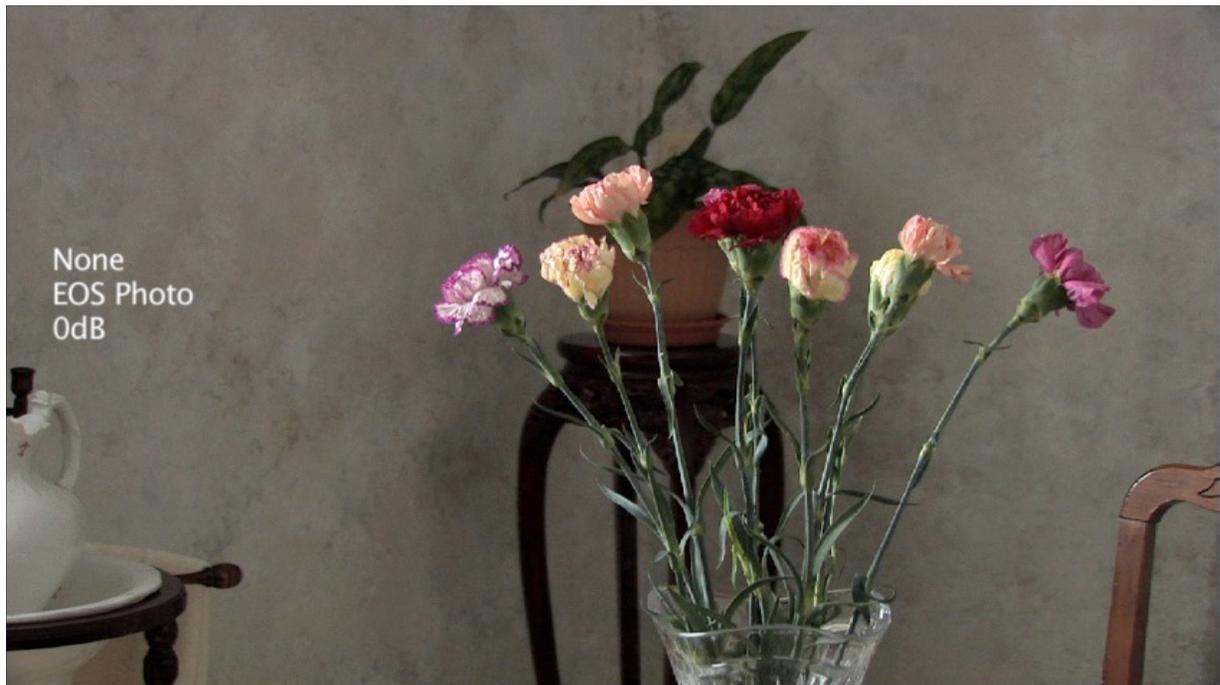

Tiffen Warm Soft FX3  
Panalook  
0dB

Tiffen Warm Black Pro-Mist 1  
Panalook  
6dB

Preset: EOS

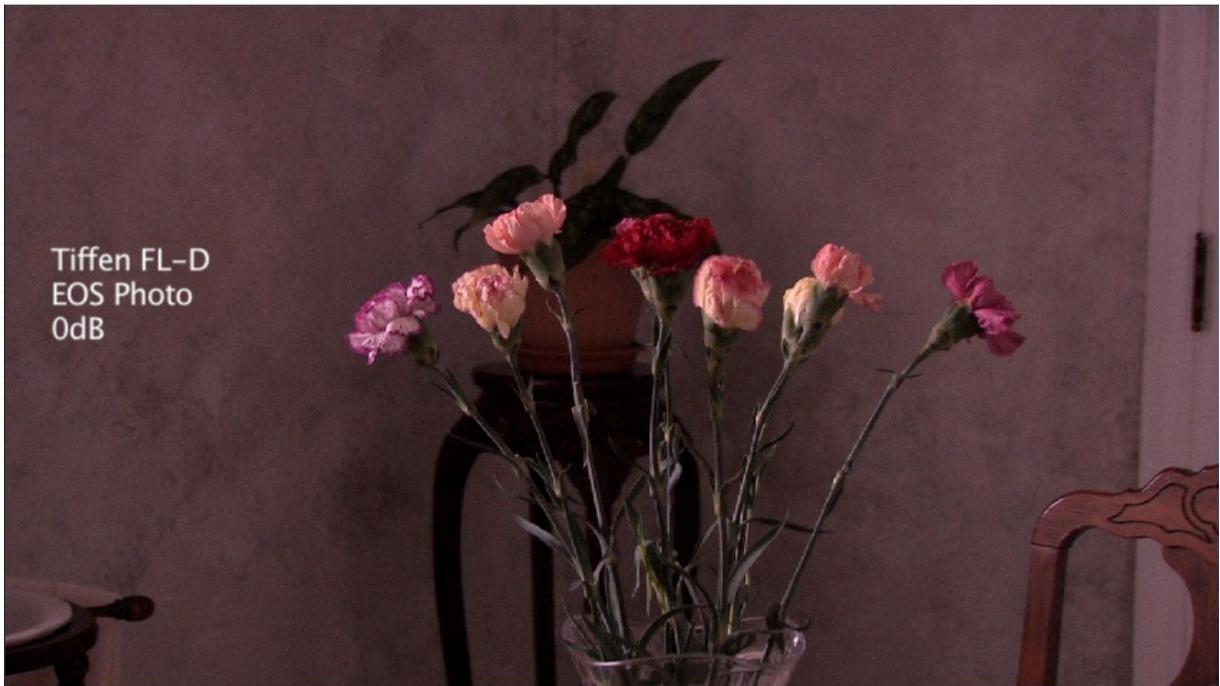

Hoya UV (0)  
EOS Photo  
0dB

Tiffen 81A  
EOS Photo  
0dB

Tiffen Warm Soft FX3  
EOS Photo  
0dB

Tiffen Warm Black Pro-Mist 1  
EOS Photo  
6dB

Preset: *Naturalo*

Hoya UV (O)  
Naturalo  
0dB

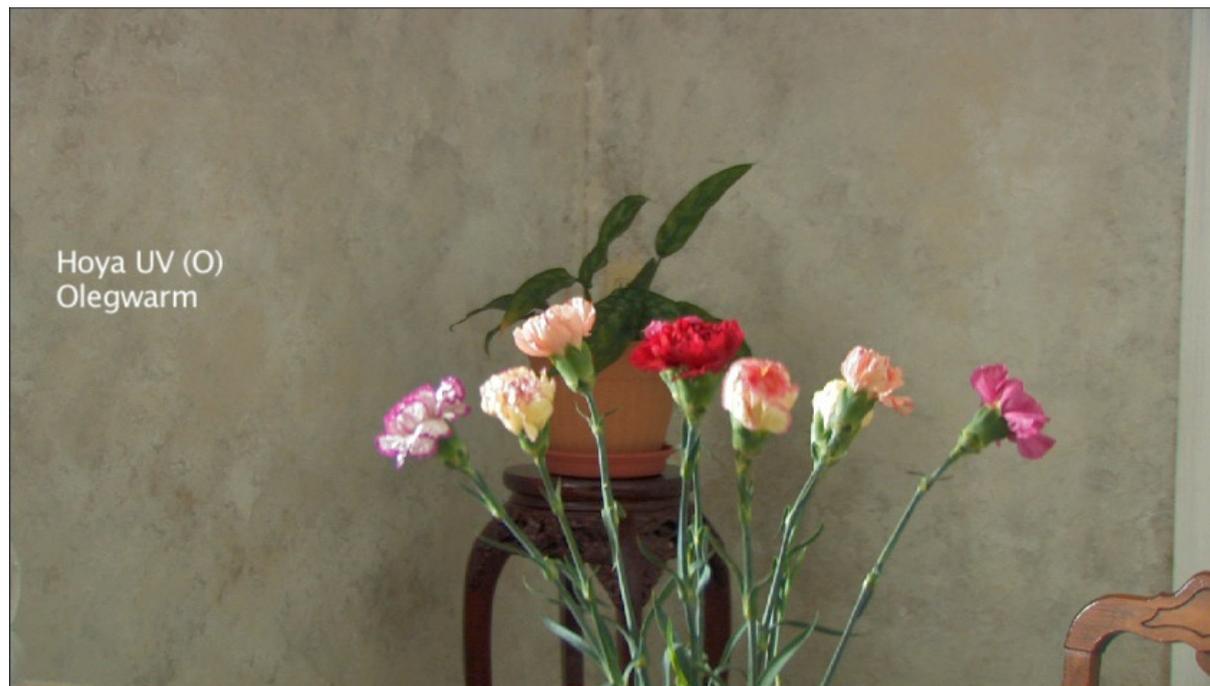

Tiffen 81A  
Naturalo  
0dB

# Preset: Olegwarm

Note: Gain at 6dB

Tiffen 81A  
Olegwarm

Vivitar 81B  
Olegwarm

Tiffen FL-D  
Olegwarm

Tiffen Warm Soft FX 3  
Olegwarm

Tiffen Warm Black Pro-Mist 1  
Olegwarm

Tiffen Black Pro-Mist Warm 3  
Olegwarm
